

Natural ingredients offer nature's goodness

Peppermint is an aromatic herb used traditionally over the centuries to maintain a healthy digestive system.

Chlorophyllin is the soluble form of chlorophyll, the green plant pigment. Chlorophyllin is often used by herbalists as the final part of a digestive system cleanse.

Morus, also called mulberry, is high in chlorophyll content.

In 1913, Dr. Richard Willstatter, a German chemist, discovered the functions of chlorophyll. Chlorophyll is a web of carbon, hydrogen, oxygen and nitrogen atoms grouped around a single atom of magnesium. Nature's green pigment is similar to the web of atoms found in Hemoglobin, the red pigment in blood, except that its centerpiece is a single atom of Iron.

About Synergy WorldWide

Synergy WorldWide, led by Founder and CEO Dan Higginson, is one of the world leading companies specializing in health and anti-aging products. The highly capable team of executives has more than 70 years of combined experience in the network marketing industry and the determination it takes to achieve success.

Since its founding in 1999, Synergy has established a proven track record of success in markets around the world. Synergy WorldWide is a division of Nature's Sunshine Products (NSP), a respected debt-free company with more than 35 years in the herbal-health industry.

PHYTOLIFE

Build Sustain Enhance

SYNERGY
build • sustain • enhance

The modern diet is out of balance. Our high-octane lifestyles and poor food choices leave many of us at risk of not getting the right proportion of the nutrients we need. One of the most important nutrients missing from today's diet is chlorophyll.

PhytoLife is formulated to:

- Maintain a healthy digestive system
- Contain antioxidants to neutralize free radicals

Chlorophyll is the green matter in plants formed during photosynthesis. It derives energy from the sun and performs various life-promoting functions for plants. Backed by the 1915 Nobel Prize, chlorophyll naturally contains important vitamins, minerals and essential nutrients that can help maintain a healthy body.

The science behind PhytoLife is an advanced process that concentrates chlorophyll and other photosynthetic elements and delivers them in a convenient, easily digestible form.

.....

“Health begins with building a strong foundation. We must consume the proper nutrients to build healthy cells, bones, and tissue. When we create the right conditions for wellness, eat the right foods, and take proper supplements, we can achieve the dynamic health that will help us maintain our youth and vigor long into old age.”

—William J. Keller, PhD
