

**Powerful ingredients
work together, formulated
for a healthy heart**

L-arginine is a vital amino acid that is best known for its connection to the cardiovascular system. In the body, L-arginine is converted to nitric oxide, which works on the arteries and blood vessels.

L-citrulline is an amino acid that is metabolized to yield more L-arginine, which in turn provides additional nitric oxide.

Vitamin D3 has long been known to aid in calcium absorption, but it also plays a significant role in healthy cardiovascular function.

The ProArgi-9+ formula also contains ingredients such as pomegranate, ribose, xylitol, and vitamins B6, and B12. Together, these ingredients are nutritional ingredients carefully selected for the cardiovascular system and heart.

About Synergy WorldWide

Synergy WorldWide, led by Founder and CEO Dan Higginson, is one of the world leading companies specializing in health and anti-aging products. The highly capable team of executives has more than 70 years of combined experience in the network marketing industry and the determination it takes to achieve success.

Since its founding in 1999, Synergy has established a proven track record of success in markets around the world. Synergy WorldWide is a division of Nature's Sunshine Products (NSP), a respected debt-free company with more than 35 years in the herbal-health industry.

Visit us at www.synergyworldwide.com to learn more about our revolutionary line of nutritional and personal care products.

PROARGI-9+

Build Sustain **Enhance**

Provide L-arginine to your circulatory system

The heart is a powerful muscle and the most important organ in the body. Therefore, maintaining optimal heart health and supporting the cardiovascular system are critically important for long-term wellness. ProArgi-9+, a component of Synergy's V3 Nutritional System, helps by providing L-arginine to your circulatory system.

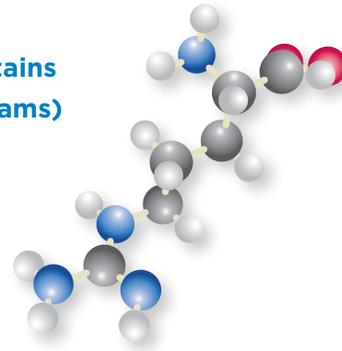

“L-arginine is involved with the entire cardiovascular system. More and more, health experts are saying, ‘We can’t ignore the power of L-arginine anymore!’”

—J. Joseph Prendergast,
Synergy Medical Advisory Board

L-arginine serves as a stimulator for the production of nitric oxide. Nitric Oxide is an important natural substance involved in the cardiovascular system, which was validated by the 1998 Nobel Prize in Physiology and Medicine.

One serving of ProArgi-9+ contains 1600 mg (1,6 grams) of elemental pharmaceutical grade L-arginine.

Nitric oxide expands the arteries, which in turn helps support the blood flow. Nitric oxide is naturally produced in the endothelial cells of the arteries, but, as a gas, it only has a lifespan of a few seconds. Increased production of nitric oxide prevents the molecule from inactivating.

Benefits of ProArgi-9+

- Formulated for cardiovascular health
- Supports oral health with Xylitol
- Supports energy levels
